Cumulative LTV per subscriber (INR)

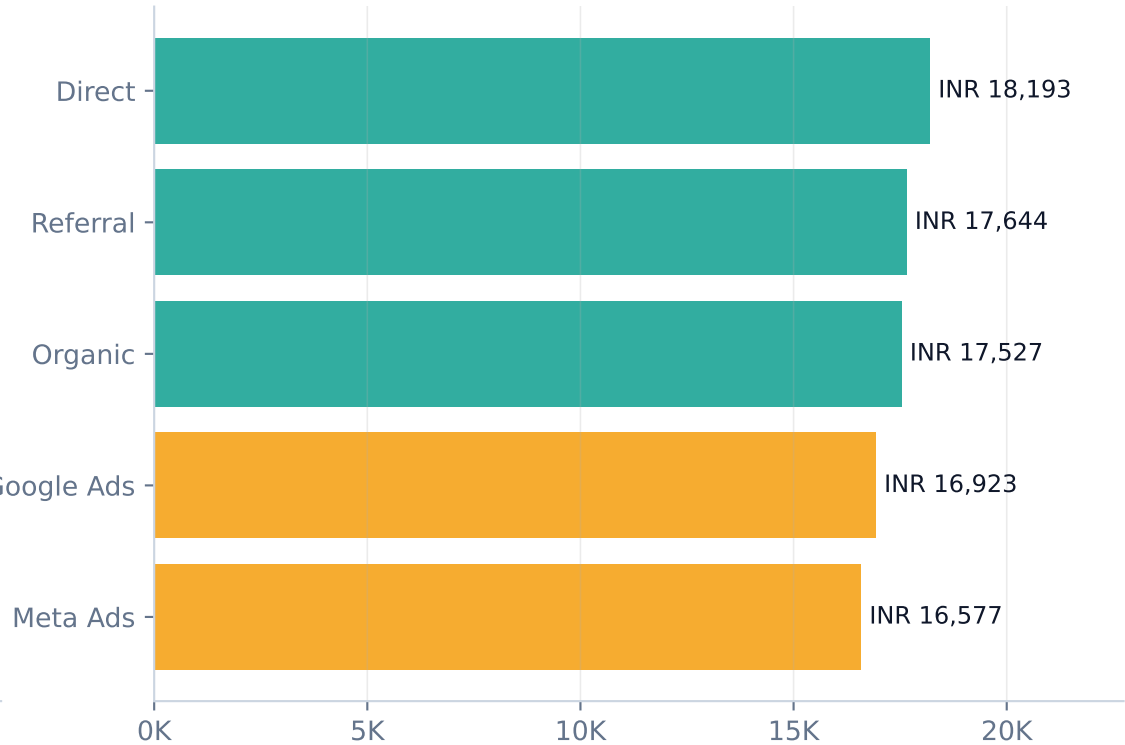

NPS by churn month · M2 detractor rate 3.0× retained

Churn drivers · LogReg coefficients

12-month LTV by acquisition channel

RECOMMENDATION · Trigger a 'Month-2 Save Plan' (loyalty credit + free Swap) for subscribers flagged by the model at day 30 — flags 28% of base at 78% precision, directly addressing the NPS-driven early-churn cliff.
